# Family Health Centers of Baltimore Charity Golf Tournament Sponsorship

Diabetes is a chronic condition that affects growing numbers of men, women and children. The FHCB Diabetes Collaborative is a preventive and treatment program that teaches patients how to control the condition and to preserve their health. Dental treatment is important to the overall health of diabetic patients. Unfortunately, low income adults have very little access to dental care. FHCB's Cherry Hill Road practice is located in a federal designated dental shortage area, and is a safety-net dental provider for low income people. To support these services, however, we must raise funds.

The proceeds from this tournament will be used to provide dental treatment to uninsured low-income diabetics. Please consider becoming a corporate sponsor for this worthwhile cause.
